Backend focused Full Stack Developer with experience building enterprise systems using Spring Boot, React, and MySQL.

Passionate about developing scalable business applications, backend systems, and operational software solutions.

EDUCATION

Computer Science Engineering

Hyderabad

Guru Nanak Institute of Technology (CGPA: 9.12 / 10)

Dec, 2021 - Jun, 2025

+2 Science Stream

Yogikuti, Nepal

Tilottama Secondary School (GPA: 3.71 / 4)

Jul, 2019 - Sep, 2021

SEE

Pharsatikar, Nepal

Tilottama English Secondary School (GPA: 3.7 / 4)

May, 2006 - Apr, 2019

PROJECTS

Finished Goods Warehouse Management System

Developed a production-grade warehouse inventory and pallet tracking system for First Choice Foods Limited to manage finished goods storage, chamber occupancy, pallet transfers, dispatch workflows, audit logging, and PDF-based reporting across multiple cold storage chambers. Implemented real-time inventory analytics dashboards, location validation logic, role-based authentication, and RESTful APIs for warehouse operations.

Impact: Systems currently actively used in live production at First Choice Foods Limited.

Technologies used: Spring Boot, Spring Data JPA, JWT Authentication, MySQL, React, Tailwind CSS, REST APIs, Ubuntu LTS, Tailscale

GitHub: <https://github.com/SubediBinod/FCF-Finished-Goods-Warehouse-Management-System>

Potato Inventory Management System

Developed an enterprise agricultural inventory management platform for First Choice Foods Limited to handle seasonal potato procurement, lot-based stock tracking, grading operations, dispatch management, return handling, analytics dashboards, and audit-based reporting workflows. Implemented stock monitoring by floor, variety, and potato type with secure role-based access and PDF report generation.

Impact: Systems currently actively used in live production at First Choice Foods Limited.

Technologies used: Spring Boot, Spring Data JPA, JWT Authentication, MySQL, React, Tailwind CSS, REST APIs

GitHub: <https://github.com/SubediBinod/FCF-Potato-Inventory-Management-System>

Farmer Ledger Management System

Developed a farmer procurement and financial ledger management platform for First Choice Foods Limited to manage farmer registration, cultivation records, seed distribution, potato procurement tracking, payment settlements, and balance calculations. Implemented group-based farmer organization, ledger history tracking, and financial computation workflows for agricultural operations.

Impact: Systems currently actively used in live production at First Choice Foods Limited.

Technologies used: Spring Boot, Spring Data JPA, JWT Authentication, MySQL, React, Tailwind CSS, REST APIs

GitHub: <https://github.com/SubediBinod/FCF-Farmer-Ledger-Management-System>

Intelligent Multimedia Summarizer and Learning Assistant

Developed a smart, AI-driven web application designed to simplify content consumption from text, audio, and video sources. The system features modules for document summarization, speech-to-text conversion with summary generation, and YouTube video summarization.

Technologies used: Java, Spring Boot, Natural Language Processing (NLP), JavaScript, HTML, CSS, Google Speech API, YouTube API, OpenAI API

GitHub: <https://github.com/SubediBinod/intelligent-multimedia-summarizer>

Optimized Exam Duty Allocation System

Developed a web-based system to efficiently allocate exam duties to faculty members. The system integrates with a MySQL database for managing room and faculty information and includes an automated email notification feature to inform faculty members of their exam schedules

Technologies used: Servlets, JSP, JDBC, MySQL, HTML, CSS and Jakarta Mail
GitHub: <https://github.com/SubediBinod/Exam-Duty-Allocation-System>

EXPERIENCE

IT & System Engineer

FIRST CHOICE FOODS LIMITED | 2025 – Present

- Develop and deploy enterprise internal applications including warehouse inventory, potato inventory, and farmer ledger management systems using React, Spring Boot, JPA, JWT, and MySQL.
- Manage IT infrastructure, network operations, and technical support across multiple departments.
- Configure and maintain an on-premises Ubuntu LTS server with secure remote access using Tailscale VPN and SSH.
- Handle MikroTik network administration, ISP coordination, and office hardware/software troubleshooting.
- Automate deployment workflows, scheduled backups, and server maintenance operations.
- Provide remote technical support using AnyDesk, SSH, and VPN-based administration tools.
- Train staff on internally developed software systems and digital workflows.

TECHNICAL SKILLS

- Programming Languages: Java, C
- Frameworks & Backend: Spring Boot, Spring Data JPA, Spring Cloud (Config Server, Eureka, API Gateway)
- Web Technologies: React.js, Redux, HTML, CSS, JavaScript
- Databases: MySQL
- Messaging & Integration: RabbitMQ
- Tools & Platforms: Git, GitHub, Docker, cPanel, Linux
- Networking & Infrastructure: Ubuntu LTS, MikroTik, Tailscale, SSH
- Office Tools: MS Office, Google Workspace

ACHIEVEMENTS

Department Second Topper

Ranked 2nd in the Computer Science and Engineering Department at Guru Nanak Institute of Technology (B.Tech CSE, Class of 2025)

TRAINING /CERTIFICATIONS

Wipro - Talent Next

2024

Completed training on Java Full Stack development

LANGUAGES

Nepali, English, Hindi
